

Adaline Powell

Milwaukee, Wisconsin | adalinebrynnpowell@gmail.com | (920) 843-7375 | [LinkedIn](#) | [Github](#)

I am a data-focused professional with 5 years of academic, research, and applied data experience. I am drawn to projects that begin broadly, where curiosity and thoughtful questioning drive actionable insights.

EDUCATION

Master of Science, Data Science	<i>University of Wisconsin–Milwaukee (2027)</i>
Master of Arts, Political Science	<i>University of Wisconsin–Milwaukee (2025)</i>
Bachelor of Arts, Political Science (Pre-Law)	<i>University of Wisconsin–Milwaukee (2023)</i>
Bachelor of Arts, Philosophy	<i>University of Wisconsin–Milwaukee (2023)</i>

WORK EXPERIENCE

Research Assistant *September–December 2025*

Argosy Foundation - Milwaukee, WI

How Are Foundations Navigating Uncertainty?

- Objective: Identify actions and strategies foundations mentioned in public statements in response to economic crisis and government budget cuts.
- Conducted text analysis and topic modeling to identify recurring themes and communication patterns across a sample of Philanthropic Foundation public statements, producing results that provided a practical roadmap to support the foundation in navigating and responding strategically to the issue. Key findings were presented in an infographic for stakeholders.

Business Development Representative *May–December 2025*

Insuraviews – Milwaukee, WI

- Supported clients in the Property & Casualty insurance space, focusing on rate filings and competitive intelligence.
- Built and maintained relationships with insurance carriers
- Analyzed platform usage and customer engagement, providing insights to inform outreach and product strategy.

Research Assistant *June–August 2023*

Argosy Foundation - Milwaukee, WI

Nonprofit Financial Practices Analysis

- Objective: Assess how different savings ratio definitions would affect grant eligibility decisions in the absence of a widely accepted industry standard.
- Define and operationalize multiple savings ratio frameworks. Modeled funding eligibility scenarios and visualized distributions to assess impacts across portfolio. Presented insights to internal stakeholders and delivered data-driven recommendations.

PROJECTS

Mental Health Observation & Crisis Response Mapping

September 2024

- Analyzed spatial patterns of non-violent crisis and mental health-related calls in Wauwatosa, identifying spatial hotspots and coldspots and evaluating overlap with points of interest. Delivered maps, a technical report, and a presentation to the Wauwatosa Health Department and Police Department with data-driven recommendations for resource allocation and crisis response planning.

YouTube Gaming Engagement Analysis

December 2025

- Used YouTube API data to examine engagement patterns and performance.
- Built regression models and neural networks to predict engagement.
- Assessed model performance using hold-out and external validation data, and highlighted strategies creators can use to increase the likelihood of a high-performing video.

Political Science Survey Research and Experimental Design

May 2025

- Designed an original political science survey in Qualtrics, distributed via Lucid, collecting responses from 1,012 participants.
- Implemented an embedded experimental design manipulating question wording to examine partisan strength while reducing social desirability bias
- Analyzed survey data using R and presented findings as part of a funded graduate research seminar showcasing original data collection and analysis

TECHNICAL SKILLS

Languages/Tools: R, SPSS, Python, SQL, ArcGIS, LLM (ChatGPT, Claude, Perplexity), Databricks, Qualtrics

Modeling: Regressions, Machine Learning (K-means, XGBoost, Random Forests), Predictive Modeling

Certificates: Quantitative Social Data Analysis

EXTRACURRICULARS

Northwestern Mutual Data Science Institute

Women's Track and Field
